

# Release 8.0.0

## General

- **Manage Pages –**
  - **Column Finder** – The screen was glitching if you moved your mouse over the column finder on any of the manage pages. This has now been fixed.
  - **Status Search** – When a selection is made in the Status column, it will automatically select the System Status that is linked to the Status type.

The screenshot displays the 'Assets' management page. At the top, it shows 'Page: 1 of 1 Showing 3 of 13,185 total records'. Below this is a table with columns: Assigned To User Status, Assigned To Grade, Held By User, Created Date, Modified Date, Expected Replacement Date, System Status, Status, and Actions. The 'Status' column has a dropdown menu open, showing 'Deprovisioned' selected. A red arrow points from this dropdown to the 'System Status' field in the 'Edit Asset Status' form below. The form has three fields: 'Short Name' (value: Deprovisioned), 'Description' (value: Deprovisioned), and 'System Status \*' (value: Inactive). A red box highlights the 'System Status \*' field.

Assigned To User Status	Assigned To Grade	Held By User	Created Date	Modified Date	Expected Replacement Date	System Status	Status	Actions
Select	Select	Select	Select	Select	Select	Select	Deprovisioned	Clear
			2/22/2024, 1:42 PM	4/18/2024, 11:06 PM		Inactive	Deprovisioned	
			2/22/2024, 1:40 PM	4/18/2024, 11:06 PM		Inactive	Deprovisioned	
			2/22/2024, 10:55 AM	4/11/2024, 9:02 PM		Inactive	Deprovisioned	

  

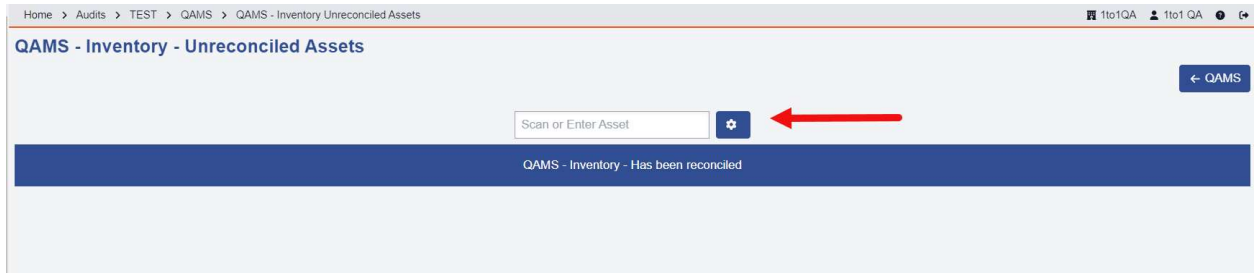

Short Name	Deprovisioned
Description	Deprovisioned
System Status *	Inactive

# Release 8.0.0

## Assets

- **Edit Assets** – Model is now showing as a required field.
- **Inventory Audit**
  - While doing some of the Audits, the sound was not working. This has now been fixed.
  - When scanning assets for a location reconciled and finished, the scanner option was not staying displayed. This has now been fixed.

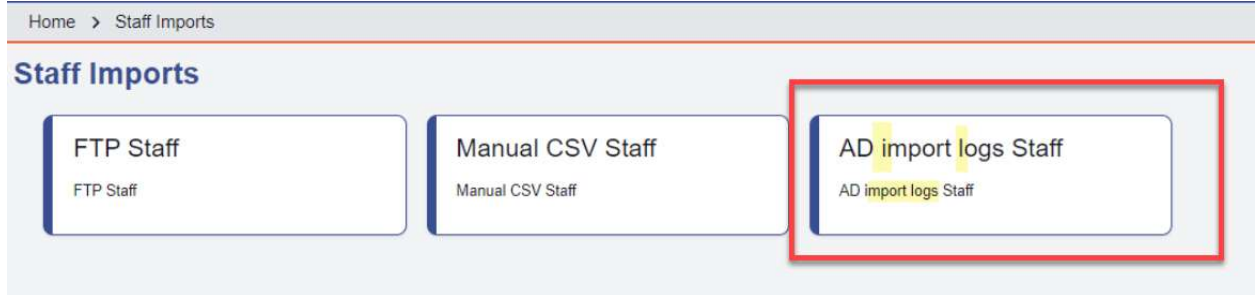

## Help Desk

- **Edit Ticket** – The breadcrumb from the edit ticket page was redirecting to My Tickets rather than the tickets Manage page. This has now been fixed.

## Students/Staff

- **Student/Staff AD Import Logs** – Fixed capitalization issue.

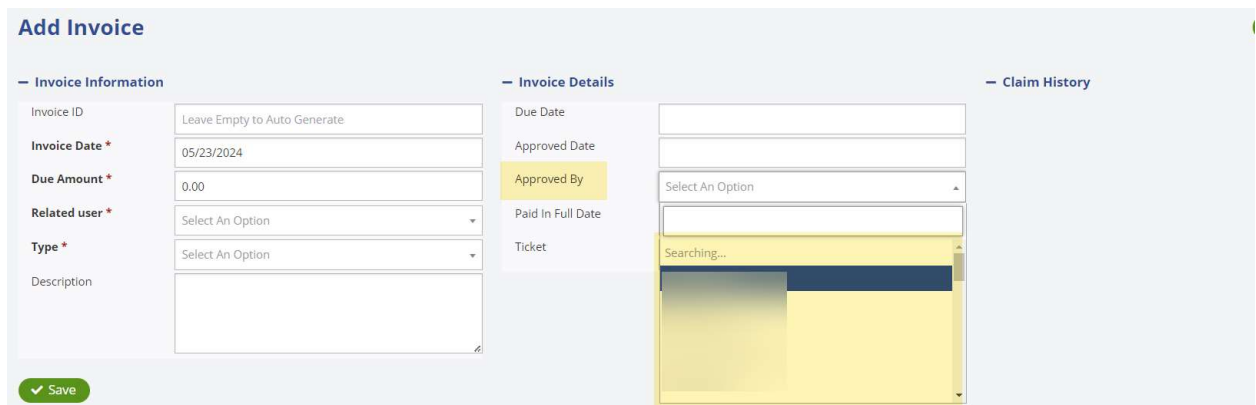

## Parts

- **Order Manage** –
  - Removed the “Description” column was displayed on the manage page that was not tied to a field on the add/edit orders page.
  - Order Status search was throwing error message. This has now been fixed.
  - View Order - The save button was removed on the view only screen.

## Invoices

- **Manage Screen** –
  - The “Related User” search was not working correctly when name was typed in the field. This has now been fixed.
  - Print All was giving error message when run for large group of invoices. This has now been fixed.
- **Add Invoice** - The “Approved By” field was not being populated. This has now been fixed.

- **Edit Invoice** – Email Invoices was sending emails to the guardian multiple times based on the number of students they are associated to. It will now only send one email.

# Release 8.0.0

## Settings

- **Tickets/Ticket Types** – Having a “>” in the short name was causing code to be displayed under Actions in various Setting screens. This has now been fixed.

**Ticket Types** + Add

Ticket Type	Description	Billable Amount	Default?	Public?	Turn In?	Category	Created by User	Actions
Chromebook>Cracked Screen		\$125.00		YES	YES	Chromebook	1to1 QA	Cracked Screen? onclick="if (confirm(this.dataset.confirmMessage)) { document.post_66604d9208a13188060361.submit(); } event.returnValue = false; return false;">
Chromebook Missing Keys		\$0.00		YES	YES	Chromebook	1to1 QA	

- **Invoices/Invoice Types** –
  - Fixed the column name to be Invoice Type instead of Short Name on manage page

**Invoice Type** Showing all 12 records

Refresh Column Fin

Invoice Type	Description	Insurance Claim Type	Created Date
