

Release 10.2.2

July Patch

General

- **Save/Clone** - A new system setting has been added to the Settings>System>System Settings area to allow the new Save and Clone buttons to be disabled. This is not a per user setting. If it is disabled, it will not show for any user.

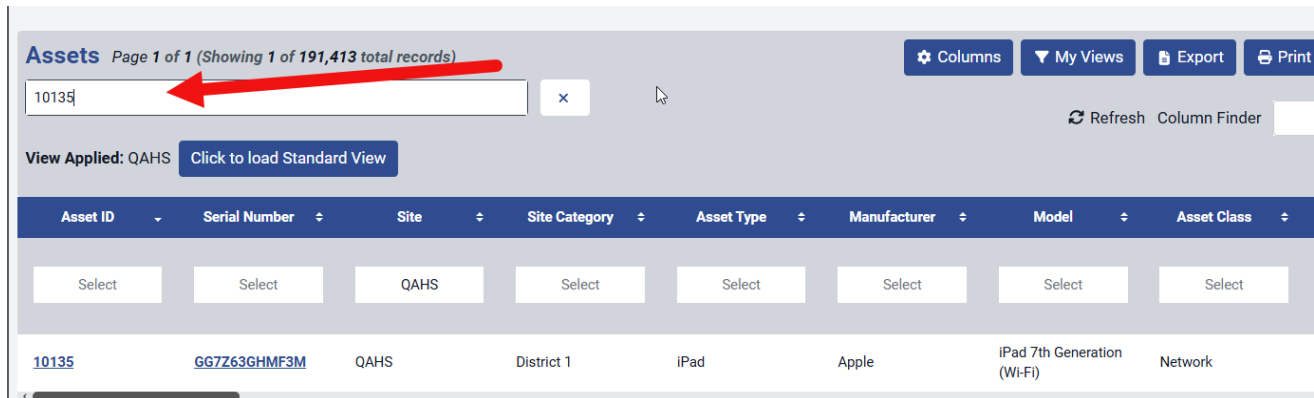

The screenshot displays the 'Edit System Settings' page in the ONE TO ONE PLUS application. The left sidebar contains a 'Settings' menu item, which is highlighted with a red box. The main content area shows various system settings, including 'Default SMTP Configuration', 'Print Settings', 'Save And Clone', 'Logo', 'Related Files', and 'Dashboard'. The 'Save And Clone' section is highlighted with a red box, showing a list of items with checkboxes: Assets, Tickets, Invoices, and Rules, all of which are checked. The 'Settings' menu item in the left sidebar is also highlighted with a red box.

Release 10.2.2

July Patch

Assets

- **Manage Screen** - There was a latency issue with using the search bar if custom fields were added to show in the columns. This has now been resolved.
